Professional Summary

Aspiring Data Scientist skilled in Python, SQL, Machine Learning, and data analysis. Eager to apply analytical and problem-solving skills to build data-driven solutions while gaining hands-on industry experience.

Education

Bachelor of Technology - Computer Science & Engineering	2022-26
Govt. College of Eng, Jalgaon	
CGPA: 8.37	
Intermediate – PCM	2019-21
Dayanand Science College, Latur	
Percentage: 96.83%	
SSC - Maharashtra State Board	2018-19
Percentage: 92.00%	

Skills

Programming: Python
Data Science: EDA, Data Cleaning, Feature Engineering
Machine Learning: Scikit-learn, Regression, Classification, Clustering
Deep Learning: TensorFlow, Keras, ANN, CNN, RNN
Natural Language Processing: NLTK, Text Preprocessing
Libraries: Pandas, NumPy, Matplotlib, Seaborn
Databases: MySQL
Tools: Jupyter Notebook, Google Colab, Git, GitHub, VS Code, Power BI, Excel

Projects

Movie Recommender System | Python, Scikit-learn, NLTK, Streamlit

- Built a content-based movie recommender using Bag of Words, CountVectorizer, and cosine similarity.
- Pre-processed movie metadata using NLTK with text cleaning and stemming.
- Generated top-5 similar movie recommendations based on content similarity.
- Developed an interactive Streamlit web application for real-time recommendations.

BlinkIT Grocery Sales Analytics | Python, SQL, Power BI

- Analysed 8,000+ retail product records to identify key sales trends and outlet performance.
- Performed data wrangling and EDA using Python libraries including Pandas, NumPy, Matplotlib, and Seaborn.
- Designed analytical SQL queries to extract insights on product demand and category-wise revenue.
- Built interactive Power BI dashboards to monitor KPIs such as total revenue, item visibility impact, outlet size performance.

Zepto Product Analysis | SQL

- Performed SQL-based business analysis on Zepto's product inventory dataset.
- Analyzed pricing, discounts, inventory status, stock availability, and category performance to generate business insights.
- Developed optimized SQL queries to evaluate product availability, pricing strategies, and category-wise performance.
- Generated actionable insights by identifying top-performing categories, discount effectiveness, and inventory gaps for business decision-making.

Certifications

- NPTEL Python for Data Science
- NPTEL Introduction to Machine learning
- NPTEL Deep Learning
- Udemy Statistics for Data Science and Business Analysis
